

Onsite Wastewater Permit Instructions

Construction of any portion of the wastewater system may not begin until a construction permit has been issued by CUHD (UAC R317-4).

The following items must be submitted together before a construction permit will be issued:

- Completed Application**
 - To be completed by property owner
- Completed Soil Classification Form**
 - To be completed by onsite wastewater professional (Level 1+)
- Site Plan**
 - To be completed by property owner or contractor
- System Design**
 - To be completed by onsite wastewater professional (Level 2+)
- Operation & Maintenance plan/contract**
 - Alternative Systems only
- Permit Fee (non-refundable)**

Once all required information has been submitted, the soil classification, site plan, and system designed will be reviewed for code compliance. When everything has been deemed acceptable, a construction permit will be issued, and construction may begin. The review process usually only takes a couple of days, but may take longer if corrections or adjustments need to be made. The permit will be sent to the email address on the application.

Soil Classification Record

Site/Property: _____

Owner/Applicant Name: _____

Soil Log			% Rock		% Soil Particle		
Soil Layer Depths	USDA Soil Texture	Soil Structure	Gravel	Cobbles	Sand	Silt	Clay
Surface to _____"							
to _____"							
to _____"							
to _____"							
to _____"							
to _____"							

Percolation Test Results (when applicable)										
Soil Percolation Test #	Total Depth of Hole (in.)	Period of Time Hole Presoaked	Period of Time Soil Allowed to Swell	Initial Depth of Water	Beginning Time	Final Depth of Water	Ending Time	Distance Water Dropped	Elapsed Time	Perc. Rate Min/in
Final Stabilized Percolation Rate										

- Hydraulic Loading Rate (based on most restrictive layer): _____
- Maximum Anticipated Groundwater Elevation: _____ Reasoning: _____
- Maximum Trench Depth: _____

Onsite Wastewater Site Plan Requirements

The following items must be included on the Site Plan:

- Date of plan
- Address and legal description of property
- Lot dimensions
- North arrow
- Ground surface contours, general slope of ground
- Locations of all structures
- Location and dimensions of driveways, parking areas
- Location of current or planned trees
- Location and dimensions of wastewater system
- Location of soil exploration holes
- Location of water service lines
- Location of easements and right-of-ways affecting property
- Location of any surface waters (ditches, canals, streams, ponds, etc.)
- Location & distances to water supply sources and protection zones

Onsite Wastewater System Design Requirements

The following items must be included in the System Design:

- Calculations of flow and sizing requirements
- Scale used
- Schedule, material, and size of pipe to be used
- Septic tank manufacturer, size, maximum burial depth
- Type and size of drain media (gravel) to be used
- Type of barrier material to be used (straw or fabric)
- Type of chambers to be used: manufacturer, model, size
- Indicate risers, clean-outs, sampling ports as required
- Cross section of trench
 - Depth and width of excavation
 - Depth of pipe or chamber inlet
 - Depth of drain media
 - Barrier material
 - Depth of backfill
 - Maximum dig depth of trenches
- Installation Instructions (orientation of perforated pipe, etc.)
- Signature of certified designer
- Distance from any building foundation
- Distance between septic tank and trenches
- Distance between trenches and length of distribution lines
- Slope of building and effluent sewers
- Slope of distribution laterals
- Relative elevations, if required
- Location and distance of:
 - Property Lines
 - Easements or right-of ways
 - Roadways, driveways, parking areas
 - Soil exploration and perc. test holes
 - Replacement area
 - Water supply lines
 - Private water source & protection zone
 - Any watercourse, lake, pond, etc. within 200 ft.
 - Curtain drains
 - Down slope, cut bank, or top of embankment

Onsite Wastewater System Permit Application

Property Tax ID/Parcel #: _____ Date: _____

Property Address: _____

Directions to site: _____

Lot Size: _____

Owner Name: _____ Owner Phone: _____

Mailing Address: _____

Email: _____

Soil Tester: _____ Certificate #: _____

Designer: _____ Certificate #: _____

Installer: _____

Planned Construction:

- Residence - # Bedrooms: Main level(s) _____, Basement (incl. future) _____
- Commercial - Planned use _____, # Employees, etc. _____

Drinking Water Source:

- Public - Name of system: _____
- Private - Well, Spring, Other: _____

Applicant Signature: _____
